SUBJECT: Change Proposal HY-1, New 100" Collimator Stand

TO: Contracting Officer

The WSPO has queried the FOG using organization regarding the need and usefulness of a new 100" Collimator Stand. FOG states that the performance of the 73B Configuration does not warrant collimation at user level, but should be returned to the depot when collimation is necessary.

Request that you notify the contractor of WSPO disapproval of subject change proposal.
